AI-Powered Contact Sorting

SyncSales uses machine learning to intelligently group contacts by behavior, interest, and activity. You'll instantly spot hot leads, disengaged profiles, and conversion-ready targets; all in one clean view. No messy spreadsheets. Just smart visibility, fast follow-ups, and tailored outreach that actually converts.

Zapier integration story

SyncSales plugs into over 6,000 apps via Zapier , think CRMs, email tools, spreadsheets, calendars ; to automate the boring stuff. New lead? Instantly updated in Google Sheets. Deal closed? Trigger a follow-up in Mailchimp or Slack. Your workflows work silently in the background, so you can focus on results, not repetition.

Lead & Task Manager

SyncSales keeps your pipeline organized and your priorities clear. Track every lead from first contact to conversion, assign tasks with deadlines, and monitor progress in one clean dashboard. Whether you're juggling follow-ups or coordinating with your team, everything stays synced, visible, and actionable — no more missed opportunities or scattered to-dos.
